road leading through the woods between Stankow V Jeyn Joyn and LEBSKOW (0 53/V 51).	
25X1A The report, including the observed motor	
25X1A Comment: The report, including the observed motor	
The state of the 7th	
vehicle numbers, confirms that component units of the 7th Gds Mecz Div (Cadre) and of the 10th Gds Tank Div (Cadre)	
were still located in the IIABLROSE training area in early September 1949. Since, contrary to previous information,	
and a contribe and warked vehicles and weapons were soon in	
the JAMLITZ area, it can be inferred that the maneuvers in the LI BEROSE training area may have been completed for	
the present and that troop units were withdrawn from this	
once Previous reports state that troops left Diddition	
by train via COTTBUS, allegedly going to the MAGDEBURG area (see previous reports)* and that other troops left	
the manager area for their FRANKFURT/UGER MILL tary post	
(component units of the 7th Gds Mecz Div (Cadre) are stationed there) in mid-September 1949 (see previous report)) * *
